

Alpine Linux - Bug #2715

exclude autogenerated ca-certificates.crt from overlay

02/25/2014 03:32 PM - Timo Teräs

Status:	Closed	Start date:	02/25/2014
Priority:	Normal	Due date:	
Assignee:	Natanael Copa	% Done:	100%
Category:	Base libraries	Estimated time:	0.00 hour
Target version:	Alpine 2.7.5	Security IDs:	
Affected versions:			
Description			
In alpine 2.7 (possibly 2.6 too), the ca-certificates.crt in /etc/ssl/certs/ is autogenerated by update-ca-certificates. It is a huge, autogenerated file, and should not go to overlay.			
Suggestion, have ca-certificates package ship etc/apk/protected_paths.d/ca-certificates.list with: -etc/ssl/certs/ca-certificates.crt			
or possibly even -etc/ssl/certs/*.crt (because also the symlinks there are autogenerated)			
This will make apk exclude the related files from overlay.
