

Alpine Linux - Bug #6689

Can't unpack encrypted LBU with libressl

01/16/2017 07:16 AM - Mike Rothfuss

Status:	Closed	Start date:	01/16/2017
Priority:	High	Due date:	
Assignee:	Natanael Copa	% Done:	100%
Category:	Boot sequence	Estimated time:	0.00 hour
Target version:	3.5.1	Security IDs:	
Affected versions:			
Description			
With a fresh install of v3.5.0, libressl is shipped instead of openssl.			
The openssl apk is still required by the initramfs-init script to unpack an encrypted LBU.			
http://git.alpinelinux.org/cgi/mkinitfs/tree/initramfs-init.in			
line 58: the openssl APK reference just needs to be changed to libressl
