| Target version: | 3.8.1 | Security IDs: | |
| Affected versions: | 3.8.0 | | |

Description

after upgrading to Alpine 3.8 the acf stopped working.
after providing username and password i get page: "This page isn't working
[my_alpine_host_name] didn't send any data.
ERR_EMPTY_RESPONSE"

i also happens with fresh installation of Alpine 3.8.
i even try the edge release, the same message.

History

#1 - 07/06/2018 10:49 PM - Ted Trask

I was able to reproduce. Investigating.

#2 - 07/08/2018 04:34 PM - Ted Trask

The problem was caused by the upgrade of mini_httpd from 1.27 to 1.29.

#3 - 08/08/2018 07:13 PM - Ted Trask

- Status changed from New to Closed

- Target version set to 3.8.1

Fix has been pushed to edge and 3.8 branches at mini_httpd-1.29-r1. Patch for mini_httpd has been sent to upstream mailing list.
