

Alpine Linux - Support #9277

Rename PHP PECL delivered packages

08/18/2018 08:08 AM - Andy Postnikov

Status:	New	Start date:	08/18/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	90%
Category:	Aports	Estimated time:	0.00 hour
Target version:	3.10.0		
Description			
Currently there's 3 types of PHP extensions			
- PECL https://pecl.php.net/ binary extensions - suggestion to add "pear" to name like php7-pecl-xdebug			
- PEAR https://pear.php.net/ source code - already has prefix			
https://pkgs.alpinelinux.org/packages?name=*pear*&branch=edge&repo=community&arch=x86_64			
- few extensions that hosts on github, most of time PECL type that not tracked at PECL			
so naming could follow following pattern			
- php7-* "core" extensions, needs to add "bundled" package			
- php7-pecl-{pkgname} packages sourced from https://pecl.php.net/			
- pear one already fine			
- php7-contrib-event - or find other label

- Category set to Aports

- Target version set to 3.9.0

#3 - 08/20/2018 03:36 PM - Andy Postnikov

- Subject changed from *Rename PECL delivered packages* to *Rename PHP PECL delivered packages*

#4 - 10/21/2018 12:31 AM - Andy Postnikov

Mostly all packages in community upgraded

2 PRs waiting maintainers' feedback

- <https://github.com/alpinelinux/aports/pull/5437>

- <https://github.com/alpinelinux/aports/pull/5450>

For some reason **php7-gmagick** fails to build <https://github.com/alpinelinux/aports/pull/5449>

Looks something broken in **graphicsmagick** dependencies but rebuilding does not help

```
gmagick-2.0.5RC1 $ php -d extension=modules/gmagick.so -m
```

```
PHP Warning: PHP Startup: Unable to load dynamic library 'modules/gmagick.so' (tried: modules/gmagick.so (Err  
or relocating /usr/lib/libgomp.so.1: __cxa_finalize: initial-exec TLS resolves to dynamic definition in /usr/l  
ib/libgomp.so.1))
```

#5 - 10/21/2018 12:37 AM - Andy Postnikov

- % Done changed from 0 to 60

In testing remains

1. inotify
2. lzf
3. msgpack

4. protobuf
5. solr
6. stats
7. uuid
8. varnish

#6 - 01/10/2019 02:44 PM - Natanael Copa

what is the status here now?

#7 - 01/23/2019 07:38 PM - Natanael Copa

- Target version changed from 3.9.0 to 3.10.0

#8 - 03/27/2019 01:39 PM - Andy Postnikov

One more step <https://github.com/alpinelinux/aports/pull/6846>

TODO is

community - php7-phalcon - needs check

testing - needs rename

1. inotify
2. rdkafka
3. solr (needs add check)
4. stats
5. uuid
6. varnish

#9 - 03/27/2019 02:20 PM - Andy Postnikov

Cumulative rename and fix <https://github.com/alpinelinux/aports/pull/6854>

#10 - 04/18/2019 11:20 PM - Andy Postnikov

- % Done changed from 60 to 90

The only leftover is <https://github.com/alpinelinux/aports/pull/6226>
