phoronix-test-suite & cacti has php7 support so just needs removal of php5

phpldapadmin has fork to work with php7 <https://github.com/breisig/phpLDAPAdmin> (but has no releases)

Needs testing - no mentions about issues with php7

Instead of suhosin we added testing/php7-diseval <https://github.com/alpinelinux/aports/pull/5061>

so only 4 packages needs testing:

- phpldapadmin - not clear cos mostly unmaintained

- zoneminder

- rutorrent

- drupal7 - waiting for release 7.61 (otherwise there's 3 patches) <https://groups.drupal.org/node/534483>
