

Alpine Linux - Bug #9725

lighttpd: update to 1.4.52

12/03/2018 06:50 PM - Steffen Nurpmeso

Status:	Closed	Start date:	12/03/2018
Priority:	Urgent	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	3.8.2	Security IDs:	
Affected versions:	3.8.1		
Description			
<p>I got noticed today that my server fails to become contacted by several new browsers (thanks, Kimura-san)! This was an interesting walk which finally lead to [1] and [2]. It can be reproduced by simply trying to connect with TLSv1.3 enabled curl(1). I have compiled and installed 1.4.52 locally, and everything works fine with it.</p> <p>I vote for disabling ldap, gamin and bzip2, at least (i also have no lua now).</p> <p>Note that the kerberos configure switch is false, it has to be --without-krb5 instead!</p> <p>[1] https://redmine.lighttpd.net/issues/2912 [2] https://github.com/openssl/openssl/issues/5721</p>

main/lighttpd: upgrade to 1.4.52

fixes #9725

(cherry picked from commit 76f4b25ec96a95a78534b761f30ecfa79cfe70cc)

History

#1 - 12/03/2018 07:51 PM - Andy Postnikov

PR exists <https://github.com/alpinelinux/aports/pull/5740>
probably needs backport

#2 - 12/04/2018 12:02 PM - Natanael Copa

does this really affect alpine 3.8? we use libressl for v3.8 and not openssl.
