

Alpine Linux - Bug #9742

ImageMagick version 7.0.7-32 has known bugs that prevent it from working

12/10/2018 06:32 PM - John Smith

Status:	Closed	Start date:	12/10/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Package update	Estimated time:	0.00 hour
Target version:	3.8.2	Security IDs:	
Affected versions:	3.8.2		
Description			
ImageMagick version 7.0.7-32 generates blank previews.			
There are more recent releases of ImageMagick available: https://imagemagick.org/script/changelog.php			
I've built 7.0.7-39 and it works fine, the bug is gone.			
I've tried building latest 7.0.8-16, but then php7-imagick throws warnings that it was built against an older version of ImageMagick and that may cause errors.
